### **EASY BLACK BOX REMOVAL DIRECTIONS**

- 1. PLACE THE TREE AND BOX AT DESIRED LOCATION.**
- 2. LAY TREE AND BOX ON THEIR SIDE AND DIG THE HOLE. THE HOLE SHOULD BE AT LEAST 8 INCHES BIGGER THAN THE BOX AND NO DEEPER THAN THE SOIL LEVEL IN THE BOX.**
- 3. ADD 2 INCHES OF WATER TO THE BOTTOM OF THE HOLE AND CHECK THAT IT DRAINS AWAY.**
- 4. REMOVE THE 4 NUTS AND BOLTS AND THE BOTTOM OF THE BOX, IF APPROPRIATE . CHECK YOUR DEPTH. THE TOP OF THE ROOT BALL SHOULD BE AT SOIL LEVEL OR ONE INCH HIGHER THAN THE SURROUNDING GRADE.**
- 5. REMOVE THE NUTS AND BOLTS HOLDING THE SIDE THAT IS FACING TOWARDS THE SKY.**
- 6. PULL HORIZONTALLY ON THE RIGHT SIDE SECTION OF THE BOX, SLIDING THE EDGE TOWARDS THE TOP OF THE TREE WHILE PUSHING HORIZONTALLY THE ADJOINING SECTION DOWN TOWARDS THE FAR SIDE OF THE HOLE TO RELEASE THE TABS. ONCE THE RIGHT SIDE IS RELEASED, PROCEED TO THE LEFT SIDE AND PUSH THIS SIDE HORIZONTALLY TOWARDS THE FAR SIDE OF THE HOLE. THIS ALLOWS THE SIDE TO LIFT OFF.**
- 7. USING THE 3 JOINED SIDES, GENTLY STAND UP THE TREE, ALLOWING IT TO SLIDE INTO THE HOLE, BOX AND TREE.**
- 8. REMOVE THE BOX AND POSITION THE TREE.**
- 9. PUT THE BOX TOGETHER AND RETURN FOR YOUR DEPOSIT.**
